Changes to Autograph III motorhome specifications

Dear Colleague,

Following a routine inspection of the Autograph III models on site it has become apparent that the new 6.2 Peugeot Boxer cabs are heavier than published.

In order to ensure that the published weights of the overall vehicle, including the generous user payloads, remain unchanged this development has necessitated a change to the motorhome specification. Having investigated the matter we believe the simplest way to achieve the weight saving required is to replace the spare wheel and carrier with a fix and go kit in the standard specification (equates to a net weight saving of 26.9kgs).

We are aware that this may well be a disappointment to our customers so we have taken the decision to continue to fit the spare wheel and carrier to Autograph III models as well as supplying the fix and go kit. The customer can then decide whether to retain the spare wheel and carrier or not, on the understanding that if they do it will reduce their user payload accordingly. There will be no additional charge to either the Retailer or the Customer for this extra product specification.

Key weights

Fix and Go kit	2.1 kgs (included in published MRO figure)
Spare wheel & tyre	+23 kgs (to be taken from User Payload figure if retained)
Spare wheel carrier	+6 kgs (to be taken from User Payload figure if retained)

The company web site and product brochures will be amended to reflect the new product specification. As the spare wheel, tyre and carrier is now an optional extra it will be identified as such and priced separately.

Fix and go kits will also be sent to you for all 6.2 Autograph III models you currently hold on site.

Please advise your customer of this change prior to vehicle collection and present it as per their requirement. Finally, just to iterate this relates Autograph III models manufactured on a 6.2 platform only, units built on 6.1 cabs are unaffected.

Should you have any queries in relation to this matter please contact the Bailey Customer Services Team on product.support@baileyofbristol.co.uk for more information.

I would like to take this opportunity to apologise for any inconvenience that this matter may cause you and your customers, but thank you in advance for your support and assistance.

Best regards

Dave Evans
